PROFILE SUMMARY

Product-focused software engineer with strong expertise in building scalable web applications using React.js, Next.js, TypeScript, and Tailwind CSS. Experienced in implementing state management solutions (Redux, Context API), building reusable front-end component libraries, integrating REST APIs and third-party services, and optimizing application performance. Skilled in translating business requirements into technical solutions and collaborating in Agile environments.

TECHNICAL SKILLS

- Languages: Java, JavaScript, Typescript, HTML5, CSS.
- Frameworks & Libraries: React.js, Next.js, Redux, Context API, React Hooks, Node.js, Express.js, Spring Boot, Tailwind CSS
- Databases: PostgreSQL, MongoDB, MySQL.
- Tools & Platforms: AWS (basic), Git, GitHub, Webpack, Postman, Figma, Visual Studio Code
- Concepts: OOP, DBMS, DevOps, State Management, UI/UX wireframing & prototyping, RESTful APIs, Microservices.
- Soft Skills: Communication, Problem-solving, Agile methodologies, Adaptability, Continuous Learning.

PROJECTS

AI-Powered Mock Interview Platform – Prepmania

[GitHub](#)

- Built a real-time AI mock interview platform using Gemini API with speech-to-text capabilities for interactive user experience
- Developed responsive and dynamic UI using React.js, React Hooks, and Tailwind CSS; designed scalable and reusable component library to ensure maintainability and performance
- Managed 100+ interview records using PostgreSQL (Neon) with Drizzle ORM for efficient data handling .Implemented real-time feedback flow to simulate interview scenarios and improve user engagement
- Integrated frontend with backend services for smooth data flow and state handling
- Utilized GitHub for version control and collaborative development

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, PostgreSQL (Neon), Drizzle ORM, Webpack, GitHub

WORK EXPERIENCE

Frontend Developer Intern

October 2025 – April 2026

Anervea.ai, Pune

- Developed responsive user interfaces using React.js, React Hooks, TypeScript, and Tailwind CSS, improving user experience across devices
- Implemented state management using Redux and Context API, managing complex component state across multiple modules
- Built and maintained a reusable front-end component library, improving code reusability and reducing development time across features
- Integrated REST APIs with Axios, reducing data-fetch latency and handling 100% of error states gracefully
- Optimized application performance and scalability via lazy loading, code splitting, and memoization, cutting page load time by 20%

Android Developer Intern

May 2023 – June 2023

Revolution IT Solution, Kolhapur

- Developed and optimized Android application features, improving overall performance by 15%
- Designed and enhanced UI/UX components to create intuitive and user-friendly interfaces
- Translated wireframes and design prototypes into functional UI screens
- Improved application usability and consistency by following design guidelines and best practices
- Collaborated with designers and developers to deliver a complete Android application within a 1-month timeline

EDUCATION

Bachelor of Technology in Computer Science & Engineering

DY Patil College of Engineering & Technology, Kolhapur | 2021 – 2025 | CGPA: 7.0 / 10

CERTIFICATION

- AICTE Virtual Internship – Android Development
- Cisco – Introduction to Cybersecurity
- Automating Deployments with Azure DevOps
